

## **Free Access to e-Learning Platforms from your Home or Mobile Internet Connection**

Please note that all internet service providers of Sri Lanka are now providing free access to the University hosted web servers (including LMS and Agri e-Hub) to provide connectivity to students through University web servers from your home and mobile connections.

The use of web through your home and mobile networks will not be counted for your data packages (will be provided free of charge).

This free access will be provided during the COVID-19 Pandemic.
